

Modeling strategy

Послан pashaone - 30.11.2012 12:50

Hi everyone,

First I'd like to thank Vladimir for his tutorials which are very helpful. I have a better understanding of Alias days after days thanks to them. There seems to be so few tutorials around and that is a cool initiative from you to share your knowledge.

I am currently following a degree in digital design and I hope to become an Alias modeler. I've started learning Alias 2 months ago but I still do some basic stuffs. I think I've a lack of modeling methodology or strategy and I wish someone here could give me some advices.

My teacher gave me a camrecorder (sanyo ca100) to model. I did try some different approach but I am still struggling with it. Here is a screenshot where I tried this patchlayout but each time I am stuck with those ball corners... Could someone give me some tips ? It would be nice !

I am gonna translate the message above in russian if needed.
