

Curious how you would do this

Послан SoffSurface - 10.07.2015 01:01

What's up guys,

I started using Alias a few months ago. And am working through all of Kodg's tutorials. Thanks Vlad! You are awesome!

Here is something I made in Solidworks, and now I want to remake some of it in Alias. I have attached a proposed patch layout.

Red = main slabs

Yellow = secondary surfs

blue = fillets
