

Lost resources

Hi every one. Due to an Hd crash I lost many of my CG resources, and with them also two jpegs that Alias has to shade and visually check continuity. They're called Sky (for sure) and Showroom (if I remember right) They were useful for Rhino too if you place them in the Environments folder. Here after two cars shaded with those maps

I tried to replicate the same effect (and accurate feedback) making some gradients but no one of them can compete with them. Could someone provide those two images here.

Obviously you could contact me using my profile tools.

Thanks in advance.
